---

All, EPA is providing conditional approval to begin the biota tissue collection and the lamprey ammocoete collection during the week of August 27, 2007. Please note that EPA's approval of the biota tissue FSP is limited to those procedures related to sample collection and processing. There are still some details to be worked out regarding the tissue analysis.

Chip and I are both out on vacation for the next two weeks. We will both be in the office on September 4, 2007. In the meantime, Burt Shephard is the point of contact for both the biota tissue collection and the ammocoete collection. Burt can be reached at 206-552-6359.

Thanks, Eric
